Vents and Skylights

The Hi-Arch Gambrel has full-length ridge and eave vents that provide ample passive ventilation; mechanical fans are not needed. Translucent skylight panels extend the length of the roof on both sides to provide plentiful natural lighting during daylight hours.

Overhead Doors

For added security or protection from the weather, an electrically operated overhead door can be installed in the main entranceway, with a manual exit door nearby.

Side Entrance

A side entrance offers an ideal design for storing multiple products. The side entrance can be off-centered in order to accommodate piles of various size while still providing a covered area for mixing and loading. Multiple entrances can also be provided.

Concrete Wall
