Re: Asbestos Monitoring Services for Vermiculite Removal at Town Courthouse at the
Town of Enfield, 182 Enfield Main Road, Enfield, New York 14850.

Dear Stephanie:

Please find below our unit pricing for the above-referenced agreement. This fee structure will be used to determine the cost of the asbestos project air monitoring as required by New York State Code Rule 56 & USEPA:

Labor & Analysis:

Regular Hours – up to 8 hrs. per day on weekdays	\$ 360.00/shift
Overtime Hours- after 8 hrs. or weekends	\$ 65.00/hour
Sample Analysis	\$11.00/Sample

Reimbursables:

Mileage from Office to Jobsite	\$ 0.58/mile
Drive Time (paid Office or Lab to Site)	\$ 45.00/hour

Based on projects of similar scope and size, I believe this project will require four (4) shifts and forty (40) PCM air samples. The total expected cost for monitoring that includes labor, travel expenses and analysis is approximately \$2500.00.

If additional time and samples are required to be collected, the above-referenced schedule will apply. Likewise, if less time is needed to complete the project, our bill will reflect only the time/materials spent on site

If these numbers are acceptable to you, please sign and return by Fax @ (877) 237-7258 or email- atlanticconsulting@stny.rr.com. Thank you for the opportunity to provide this proposal, and we are looking forward to working with you in the future.

Sincerely,

Matthew Weintraub
